## COMMENTS

I am not sure I see Ryan as an expert. I understand he won an award, but he cited data without sources and does not bring the level of relevant experience to be considered an expert. I did like how he linked CUE and HR/LR/ER into his speech.

---

I like how he challenged the group with his "4 3 2 1" approach and it really resonated with me. I really liked how he framed a question and how the answers were flipped from an external quality we respected to an internal reflective quality we struggle with.

---

Loved his energy and enthusiasm.

---

Love the wit and wisdom

---

outstanding opening session to get the enthusiasm going.

---

Really enjoyed the pace of his presentation and the story/strategy method he used to communicate his key messages. Would be open to hearing more from him in the future.

---

Ryan is an engaging speaker and a great communicator.

---

Ryan kept me interested. His delivery was amazing and what he spoke about you can use at work and personal life.

---

Ryan killed it. Great way to kick off the conference.

Very helpful and usable information!

---

Wish it could have been longer and a little more practical versus theoretical.

---

Wow, a great opportunity to see your own ability. Love his energy and how to become confident when speaking.

---

Great message for leaders at all levels.

---

Great Take aways!

---

Very good presentation & learnings. While not necessarily what I come to CUE for, was directly relevant to LR; it is very useful.

---

Good tips on speaking & presenting. I like his delivery.
